

Moose in Canada is for European hunters one of the most attractive game species. West Canada provinces as the main destination of Moose hunters in past are losing good reputation. Too many hunters are coming back home disappointed every season. In contrary majority of hunters hunting in Newfoundland are travelling back home happy and with good memories.

## Moose hunt in Canada 2026

We hunt North peninsula from from luxury lodge in Main Brook. Newfoundland, the most eastern Canadian province, has the highest Moose concentration in the world (2 heads per km<sup>2</sup>). In some areas moose density is 3 Moose per km<sup>2</sup> in average even! Simply **no better land for Moose hunt!** Trophy size is not as high as in Kamchatka or Alaska of course. Weight of trophy is from 9 to 20 kg with shovel span from 70 to 130 cm (30-52 inch). The advantage of this challenging hunt are affordable price and the success rate. This is the **hunt where you get the most for your money.** And odds for getting decent trophy are the highest.
